Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 4 and 5 are rejected under 35 U.S.C. 102(e) as being anticipated by Ohira et al. (U.S. patent 6,804,365).

Regarding claim 1, Ohira teaches a support structure of a loudspeaker unit that comprises a loudspeaker cabinet (20, 21, 22) having an opening for locating a loudspeaker unit (10), an anchor member (42), a supporting member (30), a positioning member (24) for positioning the supporting member as claimed. Further, Ohira teaches a cushioning member (43) that is fitted between the supporting member (30) and the positioning member (24, figure 1),

Regarding claim 4, Ohira teaches the positioning member (24) that has a fitting portion into which the tip portion of the supporting portion (30) is fitted (see figure 1 and col. 2, lines 59-60).

Regarding claim 5, Ohira teaches a cushioning member (41) that is fitted between the opening of the cabinet and the loudspeaker unit (figure 1).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ohira et al. (U.S. patent 6,804,365).

Regarding claim 2, Ohira teaches an anchor member (42) and lacks the teaching of a plurality of anchor members as claimed. However, it would have been obvious to one skilled in the art to provide one or a plurality of anchor members (42) such as first and second anchor members for the same desired purpose of better supporting the speaker unit within the case.

Regarding claim 6, Ohira teaches one set of the support structure and lacks the teaching of a plurality of sets as claimed. However, it would have been obvious to one skilled in the art to provide plurality of sets of the support structure for the speaker unit, as taught by Ohira, for providing a powerful speaker system that comprises a plurality of speakers.

Allowable Subject Matter

5. Claims 3 and 7-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 2615

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Schafer (U.S. patent 3,393,764) teaches a loudspeaker system that comprises a pair of oppositely directed loudspeakers.

Dunning (U.S. patent 4,939,783) teaches a suspended loudspeaker system.
